

Interview About Bicycle

NAME Sivasubramani
AGE 30 GENDER Male
PURPOSE OF USAGE Personal use
PERIOD (1998 – 2003) Last Ride 2015 ((In tours to enjoy at the place)
INTERVIEW TYPE ☒ Face To Face ☐ Telephone ☐ Video Call
SUPPORTING FILE ☐ Photo ☐ Audio ☐ Video
CONDUCTED BY Karthikeyan

1. We know its good but we loose it why?

- Physically cycling gives more pain
- It consumes more time to reach a place.

2. We are still using it but in different form?

- Cycling is good
- Now a days in gym we can do cycling for the purpose of body building.
- We can improve the design of cycles to be more comfortable for the user and also if can increase the speed of cycles and even the controlling options better.

3. This will not work for todays world, so should it has to change – reason.

- People will use cycle **if its design is improvised.**
- Main reason is cycle is not **promoted among people.**
- If its **promoted and enhanced in design** according to today's world people would use.

4. It works good we are using it today.

- If I have to use cycle now
- I would use it in morning as an exercise
- Travel areas nearer to my house.

1. We know its good but we loose it why?

- Using cycle we couldn't reach the place on time it is difficult as today's world is very fast.
- If we have to reach in time using cycle we have to start earlier so time will be more than while using a two wheeler.
- Morning cycling is more helpful to improve our health, Body building, and gives energy to our body.

2. We are still using it but in different form?

- Morning cycling is more helpful to improve our health,
- Body building, and gives energy to our body.

3. This will not work for todays world, so should it has to change – reason.

- Now a days another reason for people not using cycle is they feel inferior to drive cycle so everyone tries to be in comfort zone and maintain their level of status.
- People will use cycle if its design is improvised.
- Main reason is cycle is not promoted among people.
- If its promoted and enhanced in design according to today's world people would use.

4. It works good we are using it today.

- But now among younger generation awareness is being created so they are again starting to use cycles.

After this interview I desire to have a ride in cycle.

NAME Saranya L
AGE 28 GENDER Female
PURPOSE OF USAGE Commutation to school
PERIOD 2000 - 2006 (7 years)

1. We know its good but we loose it why?

- Due to life style change and advancement in requirements.

2. We are still using it but in different form?

- Yes as a workout machine for weight reduction.

3. This will not work for todays world, so should it has to change – reason.

- Due to development of laziness among the people,
- It has reduced the bicycle and increased the motor vehicle usage.

4. It works good we are using it today.

- Since it helps in maintaining the physic,
- It should be used in this generation.

1. We know its good but we loose it why?

- Its good so only I am still using the cycle.
- Some of the people are now not using because of time consumption,
- Depending on their profession, traffic in city and inferior complex.

2. We are still using it but in different form?

Yes they are still using in different way ,

- Physically challenged people use tricycle
- Rickshaw, tricycles for carrying goods.

3. This will not work for todays world, so should it has to change – reason.

Today's world is very fast and modern we can't say that it doesn't work today....if we change or enhance the model and improve facility of cycle the person using it may increase.

Government can encourage people using cycle by allocating a specific track for people using cycle.

4. It works good we are using it today.

My advise to all is everyone should ride cycle even though they know two wheeler driving or even four wheeler driving But cycling its good for health and also motivate all our children to ride bicycle.

My Cycle Riding Experience.

I am using the cycle for past 54 years. I really love to ride cycle when I was in my village because during that time there were no other vehicles were available for travelling.

In those days I would ride cycle 50km per day, and won't feel tired of travelling because traffic was less in olden days. Mostly I avoid riding cycles in night because in my younger we were not able to buy dynamo so I used to have a kerosene lamp in my cycle for any emergency travel.

After a long time I bought a dynamo fixed in my cycle.

But if we have a long ride in nights and use dynamo the tyre of the cycle will get spoiled soon so we avoid night travel. Usually we would go tonight shows for movie.

Its good I really love using cycle. I don't like to learn any other two wheeler as I have been using cycle for the past 40-45 years. My advise to all is everyone should ride cycle even though they

1. We know its good but we loose it why?

Bicycle is one of the good mode of transportation which helps the human to feel fresh & good exercise to keep our body healthy.

- The importance of bicycle falls down due to the raise of automatic gadgets/vehicles like bikes, cars which decreases the man power & saves time to travel from one place to another within expected time.
- In today's busy world everyone will look for the easy transportation which makes their travel comfortable & easy.
- Main reason why we loose bicycling - Comfort zone, Easy travel, Save man power, Minimize the time required for travelling

2. We are still using it but in different form?

Yes, in today's world we are using bicycle in different forms.

- Mainly now it has became a fashion to use a bicycle to loose weights. Out the most the stationary bicycle has became famous where in every street we have gym operated with exercise bikes and humans are very much interested to loose weight n bring back their healthy body using this method which is terribly incorrect.

3. This will not work for todays world, so should it has to change – reason.

Yes, the change is required where we need to get back to the older days where we use bicycle in order to decrease the pollution(make our environment evergreen), keep our body healthy, get rid from most common disease(like obesity).But not sure how much this is possible in today's robotic world.

4. It works good we are using it today.

- Yes, currently very few people's are using bicycle as mode of transportation(very rare n most commonly used by few classes)
- Used in different forms(stationary bicycle) which attracts the modern society.

My Opinion.

Finally I agree that bicycle has been an important mode of transportation before few decades and which looses the importance due to raise of robotic gadgets.It will be good if we start using bicycle which makes us and society beneficial in different ways .

Really a good taught to survey people's on the importance of bicycle.I am really feeling glad to be a part of survey.Thank you for choosing me as one of the partipant.Wishing you good

Thank you
